

Get the right alerts, at the right time.

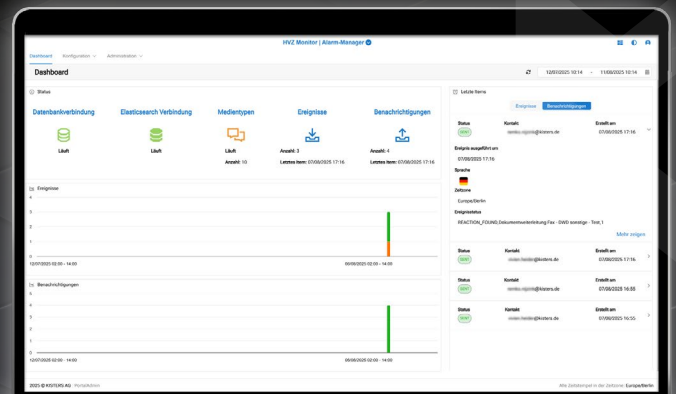

Document and Alarm Manager add-on module.

Teams often spend hours creating reports and sorting through generic alarms, which risks critical issues being missed. The Document and Alarm Manager module ensures the right alerts and reports reach the right people exactly when needed – helping teams respond quickly and maintain compliance effortlessly.

What it does:

- Customises and automatically generates reports and alarms tailored to different target groups
- Sends alarms via multiple channels including email, FTP, and WhatsApp

Benefits you'll experience:

- ✓ Save hours on manual report creation and reduce reporting delays
- ✓ Increase alert effectiveness by targeting the right people with customised notifications
- ✓ Use multiple communication channels to ensure no alarm goes unnoticed

Ideal for:

Compliance managers, communications teams, operations managers, consultants

How it works:

This module automates report generation and alarm distribution based on your custom rules. It delivers targeted, multi-channel alerts that keep your team informed and compliant, seamlessly integrating with your existing KISTERS setup.

Discover how Document and Alarm Management can help your team act fast and stay compliant.
